

# THE YOUNG SCIENTIST

## *The Journey of Snow*

### WATCH THE FILM “THE JOURNEY OF SNOW”

It begins with evaporation – then crystallization – then precipitation – then calving – then drifting – and ends with melting.

Having seen the film, you are to make models in the boxes on the answer sheet.

When you have finished your models, watch the film once again. This time you must consider if you need to change something or want to add something.
